Subject: Well Info for 4302 W Hwy 84, Gatesville

Good afternoon! Since these wells were existing before Middle Trinity Groundwater Conservation District was formed, the only info we have is what was reported on the registration forms completed by Gwen Zeigler in 2010.

Active well: drilled by Alan Daschofsky, approximately 700 feet deep, 4-inch diameter casing, 3 – 4 horsepower submersible pump, no gallons per minute listed (has question mark in blank)

Inactive well: no driller listed, not in use, no depth, casing diameter, etc listed

Sorry, this is very little information, but this is all we were given.

Debbie Montgomery
