Good afternoon! There were 3 wells registered by James Grubb with us in 2011. The one you are asking about is the only one that was registered as active, as the other two were windmills, one of which shows on the map to be in Hamilton County. The well you are asking about, district ID 4312, is registered for Livestock Watering and for watering the yard and garden. No driller is listed – says “unknown.” It was reported to be 515 feet deep, 5-inch diameter casing, with a 1.5 – horsepower submersible pump, 10 – 12 gallons per minute.
